Summary

Tech-driven Computer Science undergraduate skilled in software development, Artificial Intelligence, Machine Learning, UI/UX design, and digital media. Experienced in leading teams to deliver innovative digital solutions that drive user engagement. Recognized for academic excellence, adaptability, and hands-on project execution in dynamic, global environments.

Projects

Stayza AI – Full-Stack AI Hotel Booking System – 2025

GitHub [🔗](#) | Demo [🔗](#)

- Led end-to-end design and development of a full-stack AI hotel booking platform with secure payments and reservation workflows.
- Implemented role-based auth, user dashboards, booking lifecycle (create, update, cancel), verified reviews, and automated maintenance jobs.
- Designed the backend as a scalable API layer with vector-based hotel search, webhook-driven payment validation, and robust error handling.
- **Technologies Used:** React, Redux Toolkit, RTK Query, Tailwind CSS, shadcn/ui, Clerk, Stripe.js, Node.js, Express, TypeScript, MongoDB + Vector Search, Stripe Webhooks, OpenAI API, node-cron.

CuttingEdge '25 – IIT Flagship Tech Event Website – 2025

Demo [🔗](#)

- Contributed to the design and development of IIT's flagship tech-event website, collaborating with designers and developers to deliver all web assets on time.
- Structured page layouts, navigation, and components for speakers, schedule, and project gallery with fully responsive behaviour.
- Optimised content loading, interactions, and basic SEO for better discoverability and smoother user experience during the event.
- **Technologies Used:** WordPress, HTML, CSS, JavaScript, Elementor, Figma.

IET On Campus – Student Chapter Website – 2025

GitHub [🔗](#)

- Built the official website for the IET On Campus student chapter to publish events, announcements, and member resources.
- Designed a modular Next.js codebase with reusable UI components and MDX/Markdown content for non-technical contributors.
- Deployed a responsive, mobile-first interface and integrated basic analytics to track visits and engagement.
- **Technologies Used:** Next.js, React, TypeScript, Tailwind CSS, MDX.

pH Plotter – Interactive pH Visualisation Tool – 2025

Demo [🔗](#)

- Built a browser-based tool to help A/L chemistry students visualise pH changes in chemical solutions.
- Generates simple interactive plots from user input in a clean, minimal interface.
- **Technologies Used:** TypeScript, HTML, CSS, JavaScript.

TravX – Interactive Travel Discovery Platform – 2023

GitHub [🔗](#) | Demo [🔗](#)

- Built a lightweight travel discovery site with an inspiration-focused UI and smooth navigation for exploring destinations.
- Implemented responsive, card-based layouts optimised for clarity, quick browsing, and fast loading.
- **Technologies Used:** HTML, CSS, JavaScript, Bootstrap.

Education

- BSc University of Westminster | London**, Computer Science Jan 2025 – Dec 2028
- **Key Modules:** Object Oriented Programming, Database Systems, Human Computer Interaction & User Experience, Web Development, Algorithms: Theory, design and implementation
- Thurstan College | Colombo 07**, GCE Advanced Level Jan 2022 – Nov 2024
- **Activities and societies:** ICT Society of Thurstan College, Media Unit of Thurstan College, Astronomical Society of Thurstan College, Entrepreneur Society of Thurstan College

Skills

Technical Skills: Python, Java, JavaScript, TypeScript, C#, HTML, CSS, React, Next.js, Node.js, FastAPI, Tailwind CSS, Bootstrap, .NET 6, JavaFX, , PostgreSQL, N8N, MongoDB, SQLite, Git, GitHub, Figma, Postman, VS Code.

Personal Skills: Communication, Leadership and Collaboration, Problem-Solving & Critical Thinking, Adaptability and Quick Learning, Project Coordination, Time Management.

Certificates

- Microsoft Certified: Azure AI Fundamentals – Microsoft (2025)
- Generative AI in Action: Real-World Use Cases – Amazon Web Services (AWS, 2025)
- No-Code Machine Learning and Generative AI on AWS – Amazon Web Services (AWS, 2025)
- GitHub Foundations – GitHub (2025)
- C for Everyone: Programming Fundamentals – University of California, Santa Cruz (Coursera, 2025)
- Machine Learning for All – University of London (Coursera, 2025)
- Python for Beginners – University of Moratuwa

Volunteer Experience

TEDxColombo 2025 -I supported the organising team for the “MADness” edition, assisting with event operations, backstage coordination, speaker and attendee handling, and overall on-site logistics. This role provided hands-on experience in large-scale event execution and collaboration with multidisciplinary teams.

Cutting Edge 2025 (IIT) -I volunteered as a web developer and event assistant at the exhibition held at Temple Trees, contributing to web content preparation, coordination activities, and technical support. I worked closely with student project teams and helped ensure smooth event flow throughout the innovation showcase.

Sri Lanka Economic Summit 2025 -rovided technical support and assisted the ushering team during the summit featuring Dr. Hans Wijayasuriya (Chief Advisor to the President on Digital Economy) and Mr. Bhanuka Harischandra (Founder, Surge Global). Supported coordination, guest handling, and event-day operational tasks.

Extra-Curricular Activities

Sports -Captained the school cricket team at under-13 level and represented the school for seven consecutive years, including selection to the Colombo North Provincial team. Awarded **Best Wicket Keeper Batsman** by the Sri Lanka Schools Cricket Association (SLSCA) for the 2018/2019 under-15 season. Secondary sport: swimming, with wins at school inter-house meets and swimming gala events.

Debate -Actively participated in school debating activities and won several inter-school debate competitions.
